

FREDERICK DOUGLASS FOUNDATION OF CALIFORNIA PRESS RELEASE – COMPREHENSIVE SEX EDUCATION

DFCA believes that human sexuality is a natural design by God for procreation. DFCA supports healthy sex education and believes the primary responsibility for teaching sexuality to children lies with the parent. The values of such intimate matters should be transmitted through family values, human anatomy, and biology. Medically accurate truths about risky behaviors, sexually transmitted diseases, and pregnancy should be a part of sex education.

Comprehensive sex education (CSE) violates all the stated principles for healthy sexual development. Like a trojan horse, CSE uses euphemisms such as human rights education, gender equality, sexual and reproductive health to hide its real agenda - sexualizing children to redefine society's sexual and gender norms.

CHILDREN AT RISK

CSE encourages children to engage in high-risk behaviors like anal sex, oral sex, fisting, sex with objects like bananas, cucumbers, oral dams, and more. CSE promotes condom uses without medically accurate information leading to higher rates of sexually transmitted diseases, pregnancy, and abortion. CSE promotes children are sexual from birth, promotes sexual pleasure and promiscuity as a child's right.

CHILD PORNOGRAPHY

CSE promotes sexual rights of children at the expense of their health. It promotes sexualization and grooming of children for abuse by their peers and adults. Books used in public education like Positive Prevention, Teen Talk, Be Real, Be Ready, and others present sex in illicit pornographic terms and pictures.¹

DENIES SCIENCE

CSE promotes a plethora of created-genders in direct contradiction to human biology and anatomy. Children, beginning in kindergarten are taught there are more than two genders which creates confusion in their identity.²

UNDERMINES PARENTAL AND FAMILY VALUES

CSE undermines a parent's right to decide the content and age-appropriateness of sex education for their child. CSE promotes disrespect for parents and religious and cultural values. Minors, without parental consent receive sexual counseling, information on how to obtain on abortion, medical treatment for sexually transmitted diseases, and transgender affirming treatments. Children are subjected to mental and spiritual abuse while grooming them for physical and sexual abuse by other children and adults. CSE trains children to advocate for their "sexual rights" in laws and policies.

DFCA OPPOSES COMPREHENSIVE SEX EDUCATION IN THE PUBLIC SCHOOLS and encourages parents to explore alternative education options such as private, charter, Christian and homeschool.
